---

## **SUMMARY**

Experienced Frontend developer adept in all stages of advanced web development. Equipped with a diverse and promising skill-set. Knowledgeable in user interface, testing, and debugging processes. Have a base knowledge with backend development.

## **SKILLS**

Javascript, Typescript, React, Redux, HTML, CSS, GIT, Next.js, REST, GraphQL, MUI, Tailwind, AntD, Docker, NX, Storybook, CMS, Node.js, API Integration.

## **PROFESSIONAL EXPERIENCE**

### **Frontend Developer**

**Aug 2024 - Feb 2025**

#### **NDA, Finland - Remote**

A new small company developing a B2C web platform in the digital entertainment sector. The product focuses on delivering high-performance, real-time user experiences with an emphasis on engagement, retention, and scalability.

***Project - Admin Dashboard. Stack - React, Vite, TypeScript, React-Query, Shadcn-UI, Tailwind.***

An application designed and built using React for managing and visualizing data efficiently. The application provides interactive tables, charts, and filtering options to streamline administrative tasks.

- Implemented dynamic data tables with sorting, pagination, and filtering capabilities, allowing users to efficiently manage large datasets.
- Integrated REST API endpoints for fetching and displaying data, handling various request states (loading, error, success) effectively.
- Created interactive charts to visualize key performance metrics and trends.
- Worked closely with the backend developer to align API integration with frontend requirements.

### **Software Developer (Frontend)**

**May 2022 - Jun 2024**

#### **Esports Entertainment Group, USA - Remote**

An international company operating at the intersection of competitive gaming. EEG combines esports infrastructure and technology with licensed online betting services to deliver immersive experiences to its customers

***Project - NDA. Stack - React, Next.js, NX, TypeScript, Styled-components.***

An application built using the NX tool for monorepos to scaffold multiple sites with shared functionality tailored to different target markets.

- Maintained a scalable monorepo architecture using NX, enabling efficient code sharing and reuse across multiple apps inside the monorepo.
- Developed customizable templates and themes to differentiate apps based on market-specific requirements while maintaining core functionality.
- Implemented shared modules for common features such as user authentication, payment processing, and customer support, ensuring consistency and reducing redundancy.
- Built and maintained a library of reusable components to standardize UI elements and improve development efficiency across different brand interfaces.
- Collaborated with cross-functional teams to gather requirements, conduct code reviews, and ensure high-quality code standards across all projects.

**Frontend Developer**  
**Yellow Square, Belarus - On-site**

**Jul 2019 - May 2022**

A Belarussian digital agency designing and developing the Jamstack websites and experiences.

**Project - NDA. Stack - React, Redux, Redux-thunk, Webpack, REST, Material-UI.**

An app designed to support customer service operations, including handling reports, KYC processes, and managing user limits. An application to manage promotional campaigns, bonuses, and marketing activities.

- Developed comprehensive reporting tools that allow customers to generate detailed reports and export data as needed.
- Developed a KYC module for verifying customer identities.
- Implemented features for setting and managing user limits, such as deposit limits, betting limits, and self-exclusion periods.

**Project - Guideline. Stack - React, Next.js, Strapi CMS, GraphQL, Styled-components.**

Site for a fintech company that provides affordable and simplified 401(k) retirement plans for small and medium-sized businesses. Their platform automates plan administration, compliance, and investment management, making it easier for employers to offer retirement benefits to their employees.

- Build dynamic and responsive user interfaces using ReactJS to enhance user experience and engagement.
- Implement server-side rendering with NextJS to improve page load times and SEO performance.
- Integrate Strapi CMS for managing and delivering content.
- Develop GraphQL APIs to streamline data fetching, ensuring efficient communication between the frontend and CMS.
- Create reusable components to ensure consistency and reduce development time.
- Optimized frontend performance by implementing lazy loading, code splitting.

**Project - Company portfolio site. Stack - React, Gatsby, Styled-components.**

Visually appealing landing page for a web studio company. The site serves as a digital portfolio, showcasing the company's past projects and services. The goal was to attract potential clients by highlighting the studio's expertise and creative capabilities.

- Assisted in translating UI/UX designs into responsive web components by working closely with the lead developer and designer to ensure design accuracy and layout consistency.
- Helped set up the development environment, including installing dependencies, configuring basic tools, and preparing the project structure.
- Implemented individual sections of the website based on provided designs, focusing on visual correctness, responsive behavior, and accessibility best practices.
- Integrated basic performance improvements such as image lazy loading and efficient asset handling.
- Participated in SEO setup by adding semantic markup and ensuring proper use of headings, meta tags, and descriptive attributes.

**EDUCATION**

Yanka Kupala State University of Grodno, Physico-technical faculty, Bachelor's degree. Belarus, 2012 - 2017.

**LANGUAGES**

English: B1+, Russian: Native, Belarusian: Native.
